ONLINE SEMINAR

Human-Centered Assistive Technologies: AI, Accessibility, and Inclusive Interaction

February 18th, 2026 | 5:30 PM - 7:00 PM

- **Moderator:** Prof. Esposito (University of Parma) and Dr. Marta Luesma Meseguer (CEO & Founder of Includia, Modena, Italy)
- **Speaker:** Prof. Jeremy Cooperstock, Department of Electrical and Computer Engineering, McGill University, Montreal, Canada.

How artificial intelligence and interaction design can be leveraged to create assistive solutions that are inclusive, ethical, and grounded in real human needs?

By this question, the seminar will highlight the importance of human-centered design in developing assistive technologies that enhance autonomy, engagement, and quality of life.
